

DIGITAL EVIDENCE

Prosecution & Defence Case Preparations

Cases involving the abuse or misuse of technology will rise or fall based upon the digital evidence. Appreciating the means by which digital evidence has been extracted, secured and preserved, allows the materials to be placed into context and the instructed advocates to identify grounds for challenge and recourse in a court or tribunal proceedings.

This seminar explores electronic evidence and how such exhibits are becoming common features in all serious court matters – from corporate fraud to murder.

Attend this lecture by Expert Witness firm **AFENTIS FORENSICS**. Delegates will be brought up to speed on this important field of law that impacts on all manner of civil and criminal cases.
